

## Emidio Tartaglione

 Anzio (Roma) - Italy

Date of birth 03/03/1973 | Nationality Italian

### WORK EXPERIENCE

From April 2020 to present

#### Program Manager

In Consumer Health Company

##### Main activities and responsibilities

##### - Program Management

I coordinate Site cross-functional projects to assure they are delivered on-time, within the budget, assessing and mitigating the risks and all performance requirements are met. I develop, implement, maintain updated and continuously improved the Program management, in alignment with defined Site's priorities and the project management governance to build project management capabilities and tools (by supplying templates, methodologies, sharing best practices/lessons learned, controlling progresses, making recommendations on projects prioritization or completion, projects interdependencies, risks management and escalations, etc.).

##### - Sr Project Management

Using the process-based project management methodology and ISIPM standards, I lead strategical projects to ensure the project meets quality, timing and cost requirements.

It follows some examples of projects led:

- Product Technical Transfer and NPI (New Product Introduction on the market)
- Manufacturing and Packaging Lines installation in compliance with Health Authorities requirements
- Manufacturing, Packaging, Laboratory Operations continuous improvement, lead time reduction and losses reduction
- Inventory increasing capacity and stock improving flow
- Risk Management and Crisis and Business Continuity Management procedures.

##### Certification

- ✓ **Project Management Certification – Basic** – ISIPM - July 2020
- ✓ **Project Management Certification – Advanced** – ISIPM - February 2022

From September 2017  
to March 2020

#### Operational Excellence Manager

In Pharmaceutical Company

##### Main activities and responsibilities

I led the Continuous Improvement capabilities framework developing and monitoring the program in the plant, through value streams workshops, change management and communication plans.

I developed and implemented the OEE plan to deliver improved efficiencies driving cost reduction, improved agility, E2E Lead Time and inventory reduction.

I improved the Manufacturing work centres, Lines and Laboratory performances and areas by utilizing Lean & Six Sigma framework, principles, tools and methodology (5S, Standard Work, Visual Performance Management, TPM, SMED, Value Stream Mapping, etc.) to implement more efficient and effective ways doing business at the Site to achieve business objectives.
